# SIMULATOR EDUCATION

---

Train with your duty pistol, shotgun or rifle. Train with your department simulator and/or your tactical vest.

Use the best laser-trainer worldwide! You can build a dedicated room for dry fire training to make sure your department is ready for any scenario, anytime. You can do this all while saving on ammunition and reducing your costs.

Use our simulation solutions for more realistic training and full blowback.

## COST EFFECTIVE SOLUTIONS FOR FORCE ON FORCE TRAINING

# GLOCK 17 Gen4

This GLOCK 19 replica is functionally identical to the firearm that inspires it and is Glock authorized. Shooters will appreciate the familiar ergonomics, take down, metal slide, drop free magazine, realistic blowback action, and enhanced grip texture.

Licensed by GLOCK, Made by Umarex Elite Force and modified by ANGRUP to include our custom REAL conversion barrel with high quality SureStrike™ vibration red laser, this is the ultimate in dry-fire training.

## TECHNICAL DATA

- Laser Dot
- Length 202 mm
- Weight 659 g
- Realistic gas blowback to simulate recoil and slide cycling
- Functional GLOCK trigger and safety
- Traditional GLOCK sights
- Lightweight, rugged injection molded polymer frame w/ aluminum alloy slide

# Heckler & Koch HK417

This MP5 replica is functionally identical to the firearm that inspires it and is Glock authorized. Shooters will appreciate the familiar ergonomics, take down, metal slide, drop free magazine, realistic blowback action, and enhanced grip texture.

Licensed by GLOCK, Made by Umarex Elite Force and modified by ANGRUP to include our custom REAL conversion barrel with high quality SureStrike™ vibration red laser, this is the ultimate in dry-fire training.

- **TECHNICAL DATA**
- · GBB system with realistic blowback effect
- · aluminum housing with plastic stock / grip
- · forearm with rail system
- · mechanical diopter sight, adjustable for windage
- · overall length 808 - 888 mm, weight 3705 g
- FLASH Adapter

### **Firefly**

A microprocessor operated, custom-programmed laser, enabling multiple user ID's, different pulse length, bullet counters and other advanced features

### **Shoot Back Box (SBB)**

An optical device that simulates various scenarios during weapons training drills. Controlled by a computer, simulator operator or trip wires, the SBB will flash a light pulse to resemble a shot or explosion.

### **37mm and 40mm**

ANGRUP solutions can fit any pistol, revolver, shotgun or rifle. Use your own duty gun, or an AirSoft for a full blowback. You can also use it with Simunition / UTM conversion kits, or Glock Blue gun.

### **Simmunition**

Train Force-on-Force with your Simunition-activated firearm or Glock Blue gun, and shoots lasers that will activate your tactical vests, MILES gear or simulators.

### **MILES Compatible**

All of our laser solutions can be ordered to activate MILES products. We offer cost-effective solutions that will help to enhance your Force-on-Force training and stay in budget.

The XInte-LSS (Laser Shooting Simulator) Professional software provides the user with instant feedback on shot placement and times. When shooting with ANGRUP laser cartridge, the software detects the laser pulse, emits an audible tone, marks the location of the shot, and notes the time. X-LSS runs on your computer and uses a webcam to watch any targets for laser impacts. When X-LSS detects impacts, it instantly reports the hit with an audible tone, the exact location, and, using the fully integrated shot timer, tells you exactly when you hit.

**ANYTIME, ANYWHERE !**  
**SAVE MONEY, TRAIN MORE, KEEP SAFE.**

## Software Features:

- Shot tracking on multiple targets
- Shot timer modes: Basic (not timed), Immediate Start, Random Start, Random Start with Par, and Call Targets
- Adjustable delay for random start timer modes
- Adjustable hit-size diameter
- Adjustable hit colors
- Automatic calibration to ambient light
- Adjust camera settings from within the application
- Print report
- Multiple shot sound libraries
- Reload mode to simulate emergency reloads
- Free upgrades
